

ISC-TT Signal converter for Thermocouple T

Signal converter for thermocouple type TT, DIN rail mounting. Signal ranges selectable up to 400°C, with output ranges in 4/20mA or 0/10Vdc. Automatic cold junction compensation. Power options in AC and DC. High isolation between input, output and power circuits.

Order reference

Power	Input	Output
ISC-TT - 0 -	0/400°C -	4/20 mA
-0 (230 Vac)	0/400°C	4/20 mA
-1 (115 Vac)	0/300°C	0/20 mA
-6 (24 Vdc)	0/200°C	0/5 mA
	...	0/10 Vdc
		1/5 Vdc
		...

Dimensions

Connections

Technical specifications

Signal	Input ranges*
Thermocouple T	0/400 °C
Thermocouple T	0/300 °C
Thermocouple T	0/200 °C

Output ranges*	Type	Load
4/20 mA	active	<400 Ohm
0/20 mA	active	<400 Ohm
0/10 Vdc	active	>1 K Ohm
0/1 Vdc	active	>1 K Ohm

* Intermediate input and output ranges are available, operating the Span and Offset potentiometers.

General

Signal	Thermocouple T
Cold junction	automatic compensation
Sensor break	output to high
Input impedance	1 MOhm
Maximum overvoltage	10 Vdc
Accuracy	0.3% F.S. + 0.05°C/°C at the cold junction
Linearity	0.2% F.S.
Thermal drift	250 ppm/°C + 0.1°C/°C at the cold junction
Response time	<250mSec. (0% to 90% signal)
Bandwidth	20Hz (-3dB)
Power	
Power	230Vac, 115Vac and 24Vdc
Consumption	<3.8VA
Isolation*	
Input-output	3500Veff, optical
Power-input	3500Veff, galvanic
Power-output	3500Veff, galvanic (with AC power) 1000Veff, galvanic (with DC power)

* instrument isolated 3 ways, isolation tested during 60 sec.

Mechanical

Mounting	DIN rail standard (35x7.5mm)
Connections	plug-in screw terminal
Weight	120 grams (with DC power) 200 grams (with AC power)
Housing material	polyamide PA6 UL94 V2
Protection	IP30
