Isolated signal converter for electrical signals. Configurable to measure AC/DC voltages (ranges from 50mVac/dc up to 600Vac/dc), AC/DC currents (ranges from 5mAac/dc up to 5Aac/dc) and frequency signals (up to 100Hz). Unipolar and bipolar signal ranges accepted for DC voltages and DC currents. Output signal configurable for 4/20mA (active and passive) and 0/10Vdc. Universal power supply from 18 to 265Vac/dc. 3 way isolation between input, output and power circuits. Plug-in screw terminal connections.

Predefined configuration codes for fast and easy configuration and advanced configuration to customize input and output signals ranges. Configuration through front push-button keypad and front display. Configurable information messages (input signal value, output signal value, configured label, signal percentage and process value). Manual 'force' functions to generate low and high output signals, to validate remote instrumentation during installation. 'Password' function to block non-authorized access to configuration menu. 'SOS' mode to help on critical maintenance and repairs without affecting the manufacturing process.
